SETTING SHIPPING OPTIONS

Due to you are NOT handling the products and sometimes working with multiple dropship companies, the shipping is going to have to be setup to accommodate different locations and parcel companies prices.

If using one dropshipper, which we think is best then get their shipping charges and set them in your store as close as possible.

Because of the complexity of shipping cost when dealing with merchandise that is from various locations it can take some time to figure out what best suits your needs. We cannot set it up for you, you must decide yourself.

#15 Configure Shipping Methods

We have set up a Standard Shipping and Rush Delivery for your store.

#16 Shipping for USA Orders

We set up a basic shipping price for you, but you can determine what you think would work best. Because we do not ship products, we do not know what works the best and I recommend just playing around until you are comfortable with it. You can base the shipping charges on the price amount ordered, the number of products ordered or the weight of the products ordered. We have it set up based upon weight. Just to warn you, you will never be able to have this 100% accurate. You are working with different drop shippers (within different zones) who use different shippers and have different rates.

#17 Shipping for International Orders

Because we do not ship products, we do not know what works the best and I recommend just playing around until you are comfortable with it. Be VERY careful when shipping outside of the USA, Laws & Rules can be very different.
